Full-Stack Developer (.NET)

Description

Passionate and skilled C# .NET engineer

As Full-Stack Developer you are responsible for the general software development of our telematics platform. Together with the core development team, which consists of only the best-of-the-class engineers, you'll design, develop, test and debug new features as well as maintaining existing software.

We've set some ambitious goals to conquer Europe and we could really use some help from skilled and enthusiastic software developers. The infrastructure is built on Amazon Web Services and is using RabbitMQ, AWS Redis, MS SQL & AWS DynamoDB.

You will work from our headquarters in The Netherlands. Working remotely is possible, but we'd like to see you here pretty often.

Responsibilities

- General software development of our platform
- Design, develop, test, debug and document new features
- Maintain and improve the performance of existing software
- Cooperate with other teams like Business Development
- Provide the Management Team with input and feedback in order to fuel product development and innovation

Qualifications

You have strong development skills and coding is your second language. You are able to work in a team and have the ambition to create a top-notch platform. If you know yourself as an "intelligent geek" with a lot of general knowledge and a broad interest, you will fit in our team. You will have to meet the following requirements:

- Master degree or equivalent practical experience in the field of Information Technology
- 5 years of continuous coding experience (C#, .NET)
- Fluent in English and good communication skills (for internal communication)
- Interested in .NET Framework, multi-threaded programming, socket-server development, API design, advanced JavaScript/TypeScript programming
- Passionate about product/software development, money doesn't come first
- Highly motivated and enthusiastic

To be tested

- Generic Object Orientation, C# .NET + JavaScript programming skills
- Intelligence (IQ)

Job Benefits

We believe that the most important aspect of a job is being excited about it, having growth opportunities and working in a team you really like. Aside from all this, you will find:

- A challenging job in a fast-growing company
- A proven portfolio of products and solutions to sell in a growing market
- Both freedom and responsibility
- The tools and financials to build a company
- An attractive salary
- Remote working is OK
- ...and everything else you need to succeed!
